## Career Objective

Motivated junior data analyst with a strong foundation in data visualization, cleaning, and reporting. Passionate about transforming raw data into actionable insights to support informed decision-making. Seeking an entry-level data analysis role to apply my skills in Excel, Power BI, and Python to contribute to organizational growth.

## Education

Bachelor's Degree in Agriculture (In Progress)

University of Alexandria – Faculty of Agriculture

Currently taking a comprehensive Data Analysis program at Rowad Academy.

## Technical Skills

- **Data Analysis:** Excel (Pivot Tables, VLOOKUP, Power Query), SQL (basics), Power BI (DAX, Data Modeling)
- **Programming:** Python (Pandas, Matplotlib, NumPy)
- **Visualization:** Power BI dashboards, Excel charts, Tableau
- **Other:** Data Cleaning, Reporting, Data Modeling

## Soft Skills

- Critical thinking & problem-solving
- Strong communication skills
- Attention to detail
- Self-motivation & curiosity
- Teamwork & adaptability

## Projects

- **Sales Dashboard Development:** Built an interactive Power BI dashboard to track KPIs for sales performance, implementing DAX calculations for revenue, profit margin, and growth trends.
- **Data Cleaning & Reporting in Excel:** Processed and cleaned 5,000+ raw data rows using Excel formulas and Power Query, generating monthly automated reports for decision-making.
- **Survey Data Analysis:** Conducted data collection and analysis for a university project using Excel and Python, visualizing insights to support recommendations for improving student engagement.
